### The Story

In the Lithuanian countryside, a remarkable barn, standing proud and overbuilt, bears witness to the foresight of a wealthy landowner from over 200 years ago. More than a mere storage space, this barn was envisioned as a multifunctional hub, serving as material storage, construction room, and even a bustling market place for the local community.

The barn's exterior reflects a grandeur seldom seen in such structures. Robust and imposing, it boasts wood inlay doors that open to reveal a world of craftsmanship within. These intricately designed doors, adorned with patterns that echo the region's cultural heritage, offer a glimpse into the meticulous attention to detail that went into every aspect of the barn's construction.

Inside, the spaciousness is awe-inspiring. Large plank floors, worn smooth by generations of activity, stretch across the vast expanse of the barn. This sturdy foundation supported not only the weight of materials but also the dreams and endeavors of the people who utilized the space. The attic beams, reaching towards the heavens, tell a silent story of the agricultural bounty stored in the loft, symbolizing prosperity and abundance. Long timbers, carefully arranged on all sides, contribute to the barn's structural integrity and serve as a testament to the builder's commitment to longevity. The barn, "overbuilt" in every sense, was designed not only to withstand the test of time but to cater to the diverse needs of the community it served.

Each corner of the barn played a unique role in the lives of the local people. One section stored essential materials for the farm, another served as a construction room where tools and equipment were housed, and yet another transformed into a lively market space during the days of commerce and trade. The barn, a dynamic center of activity, became a vital part of the community's daily life.

As you step into this Lithuanian barn, you are enveloped in the rich aroma of aged wood, echoing the history and stories embedded in every plank and beam. It stands as a testament to the vision of its creator and the enduring legacy of a space that, over two centuries later, continues to resonate with the spirit of a bygone era.

# Three Forks Wood Reclamation

Three Forks overseas reclaimed wood provides exotic beauty, one-of-a-kind documented history and heritage, and incredible photographs of the discovery and disassembly of the original wooden structure for the next owner to share with family and friends.

We save the wood from structures that are at the end of their days and pass the wood, as well as its story in both pictures and words, to its next purpose, fulfilling the spirit of environmentalism to recycle and reuse.

**Financing: 50% deposit, 50% due upon delivery to customer-specified location.**

## Regulatory/Logistics

**Compliance:** USDA APHIS permits, adherence to import regulations.

**Logistics:** In-house coordination from site to delivery ensures a smooth process.

**Quality Assurance:** Kiln heating to meet all regulatory standards; contractual agreement ensures expectations of product in quantity and quality.

**Insurance:** Material insurance policy included in total cost for any loss or damage while in-transit

**Legal:** Custom contract developed by third-party lawyer for clear agreement on package quality, quantity, and timeline

## Project Deliverables

Each delivery includes a comprehensive documentation package, sharing the story and history of the reclaimed wood.

- Large landscape-style high-quality canvas picture of the structure in its original location
- Professional coffee table-style book with photographs and documentation of the site and area
- Unique accoutrement from the site for an added connection and conversation piece.
- Secure access to the Three Forks digital vault for all site photography and documentation
- Certificate Blockchain encrypted NFT of Certificate of Authenticity for provenance of all wood, pictures, and composed stories related to the site
